21 Telecom of Arizona, Inc. dba Integra Telecom) APPLICATION AND
22 for Approval of Arizona C.C. Tariff No. 4) REQUEST FOR APPROVAL

23
24 I. INTRODUCTION

25 On June 27, 2006 the Arizona Corporation Commission ("Commission" or "ACC")
26 approved the acquisition of Electric Lighwave, LLC by Integra Telecom Holdings, Inc.
27 (Decision No. 68798). On October 20, 2006 the Commission approved the acquisition of
28 Mountain Telecommunications of Arizona, Inc. by Eschelon Telecom, Inc. (Decision No.
29 68992). And on July 18, 2007 the Commission approved the acquisition of Eschelon Telecom,
30 Inc., and its Arizona operating subsidiaries, Eschelon Telecom of Arizona, Inc. and Mountain
31 Telecommunications of Arizona, Inc., by Integra Telecom Holdings, Inc. (Decision No. 69707).

32 Since June 27, 2006, Integra Telecom, Inc. (Integra) has been conducting operations in
33 the State of Arizona through Electric Lightwave, LLC dba Integra Telecom. Over the past
34 twenty months, Integra has also been working towards the full integration of Eschelon Telecom,
35 Inc. and its Arizona operating subsidiaries, with Integra's Arizona operations. Since the

1 Eschelon Telecom of Arizona, Inc. legal entity is organized and incorporated solely to do
2 business in the State of Arizona,¹ new Arizona customers will be offered service solely through
3 the proposed Arizona C.C. Tariff No. 4 of Eschelon Telecom of Arizona, Inc. dba Integra
4 Telecom. Integra hereby submits for Commission review and approval the proposed Arizona
5 C.C. Tariff No. 4 (Tariff No. 4), included as Attachment A to this Application.

6 7 II APPLICATION

8 The following information is submitted in support of this Application:

9 10 A. Need for New Tariff

11 Integra is seeking to standardize its product sets across all its Operating Market Areas
12 (“OMAs”) and to leverage its operating efficiencies. In addition to the State of Arizona, Integra
13 will be submitting similar tariffs or tariff revisions in California, Colorado, Idaho, Minnesota,
14 North Dakota and Utah. The states of Nevada, Oregon and Washington do not require that
15 competitively classified carriers such as Integra file tariffs or price lists.

16 More importantly, for Arizona business customers, through this Tariff No. 4 Integra
17 presents a single, clear set of products, rates, terms and conditions of its service offerings.
18 However, Integra will continue to honor the rates, terms and conditions set out in Eschelon
19 Telecom of Arizona, Inc.’s Arizona Tariff No. 3, Electric Lightwave, LLC’s Arizona C.C. Tariff
20 No. 2, and Mountain Telecommunications of Arizona, Inc.’s A.C.C. Tariff No. 2, for those
21 entities’ respective customers with service agreements in place prior to the proposed effective
22 date of Tariff No. 4, that is June 18, 2009.

¹ It is Integra’s intention to ultimately have an operating entity in Arizona named Integra Telecom of Arizona, Inc. The Eschelon Telecom of Arizona, Inc. entity is best suited to adopt this name in the future.

1 This Tariff No. 4 includes both proposed Maximum Rates (Sections 3 & 4) and proposed
2 actual or current rates (Section 7 – Price List).

3
4 B. Impact on Company Revenues

5 As noted in A., above, the products, rates, terms and conditions presented in proposed
6 Tariff No. 4 will not have an impact on existing customers. There will be no direct impact
7 (increase or decrease) to the Company's current revenue stream from any specific product or
8 product set.

9
10 C. Customer Notice

11 Because proposed Tariff No. 4 will apply only to prospective customers, Integra has not
12 provided notice of the filing of Tariff No. 4 to its existing customer base. However, included
13 with this Application as Attachment B is an Affidavit stating that the current customer base will
14 not be affected by any of the rates or charges proposed in Tariff No. 4.

15
16 D. Request for Expeditious Treatment

17 Rules and Regulations (terms and conditions) presented in Section 2 of the proposed
18 Arizona C.C. Tariff No. 4 do not vary substantively from those presented in Section 2 of Electric
19 Lightwave, LLC's Arizona C.C. Tariff No. 2.

20 Local Exchange Services and Miscellaneous Service Charges are presented in Section 3
21 and Long Distance Services set out in Section 4 of Tariff No. 4 are new and/or updated and
22 revamped product offerings with stated Maximum Rates in accordance with Article II of the
23 Commission's Rules, which governs the pricing of services offered by competitive local
24 exchange carriers. Integra respectfully requests that it be permitted to offer these services, at the

1 current rates shown in Section 7 – Price List of Tariff No. 4, to prospective customers beginning
2 June 18, 2009.

3
4 III. CONCLUSION

5 Given the highly competitive telecommunications marketplace and the negative pressures
6 of the current economy, Integra respectfully requests that the Commission find that Arizona C.C.
7 Tariff No. 4 of Eschelon Telecom of Arizona, Inc. dba Integra Telecom is in the public interest
8 and grant approval of this application expeditiously with an effective date of June 18, 2009 for
9 Arizona C.C. Tariff No. 4.

10
11

EXPLANATION OF SYMBOLS

The following symbols shall be used in this Tariff for the purpose indicated below:

- (C) To signify a changed condition or regulation.
- (D) To signify a discontinued rate, condition, or regulation.
- (I) To signify an increased rate.
- (K) To signify that material has been moved to another Tariff location.
- (M) To signify that material has been moved from another Tariff location.

- (R) To signify reduced rate.
- (T) To signify a change in text but no change in rate or regulation.

TARIFF FORMAT

- A. **Sheet Numbering** - Sheet numbers appear in the upper right corner of the sheet. Sheets are numbered sequentially. However, occasionally, when a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.
- B. **Sheet Revision Numbers** - Revision numbers also appear in the upper right corner of each sheet. These numbers are used to determine the most current sheet version on file with the Commission. For example, the 4th Revised Sheet 14 cancels the 3rd Revised Sheet 14. Because of various suspension periods, deferrals, etc. the Commission follows in its tariff approval process, the most current sheet number on file with the Commission is not always the sheet in effect. Consult the Check Sheet for the sheet currently in effect.
- C. **Paragraph Numbering Sequence** - There are nine levels of paragraph coding. Each level of code is subservient to its next higher level:
- 2.
 - 2.1.
 - 2.1.1.
 - 2.1.1.A.
 - 2.1.1.A.1.
 - 2.1.1.A.1.(a)
 - 2.1.1.A.1.(a)i.
 - 2.1.1.A.1.(a)i.(1)
 - 2.1.1.A.1.(a)i.(1)(a)
- D. **Check Sheets** - When a tariff filing is made with the Commission, an updated Check Sheet accompanies the tariff filing. The Check Sheet lists the sheets contained in the tariff with a cross- reference to the current revision number. When new sheets are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this sheet if these are the only changes made to it (i.e., the format, etc., remains the same, just revised revision levels on some sheets). The tariff user should refer to the latest Check Sheet to find if a particular sheet is the most current on file with the Commission.

3.7 CUSTOM CALLING FEATURES

The Company offers a variety calling features available with both Basic Business and T1-Based Local Exchange Services unless noted otherwise.

3.7.1. Feature Descriptions

3-Way Calling

Three-Way Calling enables a user on an active call to include a third party in the call.

6 - Way Calling

This feature allows a user to establish a conference call of up to six parties including the user.

Anonymous Call Rejection

Incoming Calls are rejected when the calling party does not provide caller identification information.

Call Hold

This feature allows the user to put the caller on a hard hold using a star function. This could be used on a single line phone or a phone set that has no hold button.

Call Forward Busy Line

When a line is busy, all calls are routed to a predetermined alternate telephone number or to voicemail. When activated, Call Forwarding Variable takes precedence over Call Forward Don't Answer and Call Forward Busy.

3.7 CUSTOM CALLING FEATURES, Continued

3.7.1. Feature Descriptions, Continued

Call Forward Don't Answer

When the base station does not answer an incoming call within the time prescribed, the call is routed to a predetermined alternate telephone number or to voicemail. When activated, Call Forwarding Variable takes precedence over Call Forward Don't Answer and Call Forward Busy.

Call Forward Variable

This optional feature allows all calls directed to a telephone number to be routed to a user defined telephone number or to voicemail. The user can activate/deactivate Call Forwarding and define a telephone number where all calls will be forwarded. Calls **cannot** be forwarded to an International Direct Distance Dialing number. When activated, Call Forwarding Variable takes precedence over Call Forward Don't Answer and Call Forward Busy.

SECTION 3 – INTEGRA LOCAL EXCHANGE SERVICE, Continued

3.7 CUSTOM CALLING FEATURES, Continued

3.7.1. Feature Descriptions, Continued

Selective Call Rejection

This optional feature enables a station line user to exclude calls from a list of Customer pre-programmed numbers.

Call Trace

Call Trace enables a customer to trace their last incoming call. Customer Originated Trace deals with information pertaining to a disconnected call. Information about this disconnected call is stored in a buffer. This buffer is updated each time the subscriber's line is called. Thus only the most recent incoming call can be traced. Customers can prevent access to Call Trace by requesting that Call Trace be deactivated on their line(s). See Section 3.7.5. Call Tracing for additional information.

Call Transfer

This feature allows the user to manually transfer an incoming caller to any other phone number, as well as introduce the call before hanging up.

Call Waiting

With this feature, an incoming call encountering a busy station receives audible ringing, while the called, busy station receives a call waiting tone. This feature **will not** work with hunting.

SECTION 3 – INTEGRA LOCAL EXCHANGE SERVICE, Continued

3.7 CUSTOM CALLING FEATURES, Continued

3.7.1. Feature Descriptions, Continued

Caller ID Name & Number

When an incoming call is received, this feature provides the user with a display of the caller's name and phone number

Caller ID Number

When an incoming call is received, this feature provides the user with visual feedback concerning the calling number.

Caller ID on Call Waiting

When an incoming call is received and the user is on another call, this feature provides the user with a visual display of the telephone number of the second caller.

Continuous Redial

This optional feature permits a primary station line to have calls automatically redialed when the first attempt reaches a busy number.

Distinctive Ring

Distinctive Ring Service assigns up to three additional phone numbers to one access line. Each assigned number has a distinctive ring.

Custom Number Selection

Customers may request special telephone numbers if available to the Company. Customers may choose to list letters in place of numbers in the telephone number field, but must have an associated listing (at no charge) showing the numeric translation.

3.7 CUSTOM CALLING FEATURES, Continued

3.7.1. Feature Descriptions, Continued

Hunting

This feature will route a call to an idle line in a prearranged group when the called telephone number is busy. Typically this feature is used with the customer's main telephone number and several telephone lines, so that the customer may receive calls on several lines, although all calls are placed to the same number. This feature is often used on multi-line telephone sets or key systems.

Hunting **will** work on the same line as Call Forward Variable and Call Forward Don't Answer Features.

Hunting **will not** work on the same line as a Call Forward Busy Feature as they are essentially the same feature both are activated only when the line is busy.

Hunting **will not** work on the same line as Call Waiting.

1. Circular - Circular hunting hunts all lines in the hunting group regardless of the starting point.
2. Multi-Line - Feature allows all of customer's line to reflect the same local telephone number and name for outbound Caller ID. Incoming calls first hit the main number, and then hunt to the member numbers. Incoming calls can not be placed directly to the member numbers. All toll and local usage incurred by member numbers will be billed on the main number.
3. Series - Series hunting hunts for an open line in the order that the customer designates. Unlike Circular hunting, series hunting will stop and give a busy signal or forward to voice mail at the end of the hunting sequence.
